ABOUT US

Rototech Industries is one of the leading **LLDPE Rotomoulding Powder Supplier**. Based in Ahmedabad, Gujarat, India. We have supplied our products all across the globe.

By keeping in mind our customers special need and requirement, We manufacture & supply **standard powder** as well as **custom powder**. we provide all these products at market competitive price.

Being a quality oriented organization we always upgrade our technology and knowledge in order to improve quality in **LLDPE Powder**.

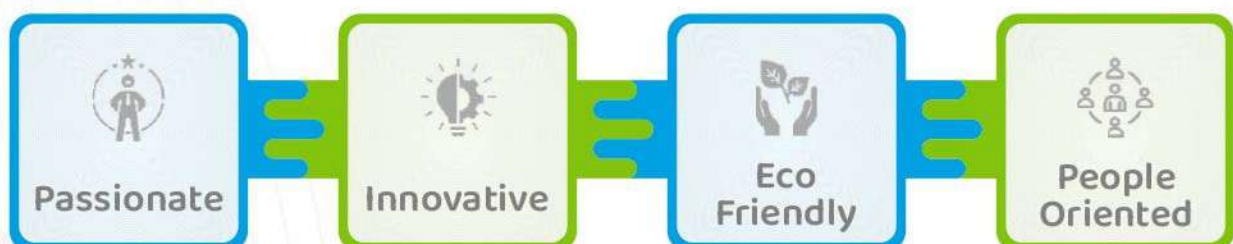

VISION

"Our vision is to become **global market leader** by providing **valuable products** at market **competitive price**".

MISSION

To continue providing **customized solutions** to our customers and be the most **trusted partner** for high quality products. To continually improve our **standards & maximum innovation**.

VALUE

VIRGIN

Rotomoulding Powder

Rototech Industries is one of the leading manufacturer, supplier & exporter of Virgin Rotomoulding Powder.

The break obstruction ought to be a significant thought while choosing a grade of polyethylene for a specific application. When exposed to worry about a timeframe most materials normally fizzle by breaking. Comprehend that various grades of Polyethylene can display limitlessly unique execution regarding break obstruction.

APPLICATIONS

RECYCLED

Rotomoulding Powder

Recycled / Reprocessed Rotomoulding powder is the establishment by the development of essence catalysts. The definite polymerization process can be done either in the result phase or in gas phase reactors. It has advanced strength and better impact and perforation resistance. It's veritably flexible and elongates under stress. It's used to produce agent flicks, with better environmental stress cracking resistance.

APPLICATIONS

ANTI MICROBIAL

Rotomoulding Powder

Anti-Microbial is a linear-low density polyethylene (LLDPE) Rotomoulding Powder designed for rotational moulding internal surface applications. It is a color compound that contains Nano silver ions and has antibacterial and antifungal properties.

The need of the day is to provide users with developed powders for rotational molding.

APPLICATIONS

UV Rotomoulding Powder

Our UV Rotomoulding Powder is developed to ensure the colors don't fade under direct sunlight of the material. The term 'long haul outside execution' is standard for roto-molders, mainly when it comes to offering UV settles crude materials. But in most cases, the decays under the direct sunlight for the polymer are quite common.

Furthermore, the UV-resistant materials for roto-molding balance the ESCR resistance and mechanical properties to ensure that the clients are not disappointed with the material.
